

We do not want any unsolicited, unwanted or unwarranted calls and are very tired of the Government telling companies that they can. Stop NOW..... We have rights to. I don't care if the telemarket companies feel that we may be missing out on an offer if we don't get their calls but Americans have the ability to hunt out a product or service if we so desire one (on our own). We don't need this harassment in anyway, shape or form. STOP THE MADNESS NOW...
